

# Wedge Table Assembly Instructions

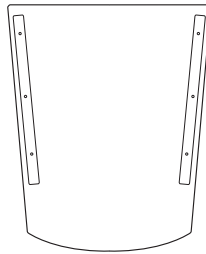

**Tools required:** Phillips screwdriver.

**Parts included:**

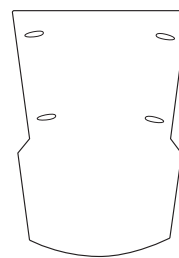

**A** Top shelf

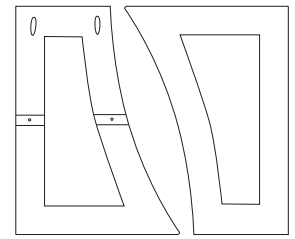

**B** Bottom shelf

**C** Middle shelf

**D** Side panels

**E** 8 x 1 ¼ Round-head screws

**F** 6 x 1 ½ Flat-head screws

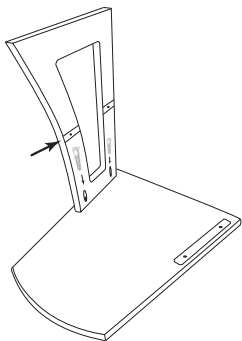

**To assemble:** Unpack and inspect contents to confirm you have all the parts listed above.

**Tip:** To avoid scratching the finish it is recommended you work on a flat surface covered with a towel, a rug, or carpeted floor.

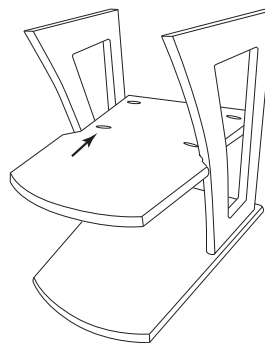

**Caution:** If using power-tools use a low torque setting to avoid striping the wood.

**1**

Place top shelf **[A]** upside down. Insert side panels **[D]** in slots and secure using the 1 ¼ round head screws **[E]**. Make sure the slots to support the middle shelf are facing in.

**2**

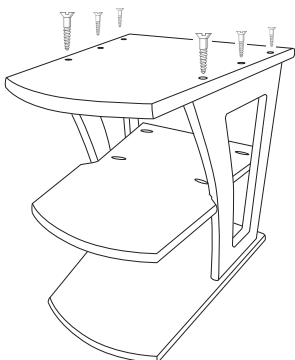

Place middle shelf in with the side slots with pocket holes for the screws facing up.

**Tip:**

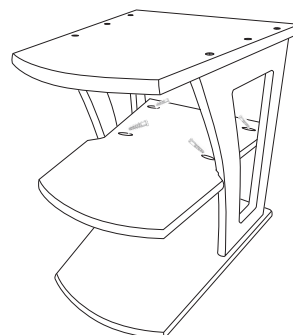

Do not secure middle shelf yet. Bottom shelf must be secured first in next step.

**3**

Place bottom shelf, positioning the slots on sides with side panels and screw down with 1 ½ flat-head screws **[F]**.

**4**

With top and bottom shelves secured, slide middle shelf so the back end is flush with top and bottom shelves and then secure middle shelf in place using the 1 ¼ round head screws **[E]**.
